ARCHIVE

OVERVIEW

Moving one step closer to a HIPAA environment is easy to attain with UltraRAD's UltraARCHIVE offerings!

Take your facility to the next level! Choose UltraRAD for a scalable, cost-efficient solution on-site or connect to our Virtual Storage Facility (VSF) for the most cost-effective off-site solution on the market.

On-site, UltraARCHIVE offers a scalable, cost-efficient solution where expandability and redundancy is Key. Off-site, we provide the power and capacity necessary to maintain fast, accurate access to critical patient medical data with a fully scalable, fully accessible product suite at an extremely affordable price. Service levels range from a single copy stored strictly for disaster recovery to single or dual copies stored in a live archive for unlimited retrievals. Need both on-site and off-site archiving? UltraCUBE is the answer, offering the storage capacity you need on-site with the same amount of space off-site at a one time fee, no additional charges ever.

UltraARCHIVE is designed to provide scalable levels of service on a fee-per-procedure basis which can include all equipment, communications, installation and service. Without heavy capital expenditure and no charge for retrievals, the customized solutions we offer are extremely cost effective. UltraRAD also provides 24/7/365 support and accessibility to your patient medical data in a fully secure environment complying with all HIPAA guidelines.

Always accessible, always expandable, reliable, flexible and secure!

FEATURES

- Scalable On-Site Hardware and Software Solutions!
- Full Suite of Off-Site Archiving Services!
- Fully DICOM and HIPAA Compliant!
- Unlimited Retrievals at no additional cost – Ever!

The Ultimate Choice in Digital Imaging!

From a single server PACS archive to a regional image repository, see your Archive Solution grow! Your facility deserves all of the advantages of digital image management at a low entry cost!

Start small and scale up to meet the changing needs of the clinic, department, enterprise and region.

Service Options

Disaster Recovery

Add another copy off-site for the assurance that a copy of your entire facility's data is securely located elsewhere in case of an emergency.

UltraARCHIVE SSP

Single copy off-site provides your facility a significant step toward HIPAA compliance.

UltraARCHIVE Advantage

Includes Near Archive Server with security protection, communication links, and two redundant copies off-site. A truly 'Hands-Off' solution!

UltraARCHIVE Premium

Any service can be upgraded to add an internet connected web server and regional or national redundant off-site storage capabilities.

Connectivity Options

UltraARCHIVE is part of the UltraPACS software suite and will seamlessly connect to any of the following UltraRAD products.

Robust DICOM router providing image distribution, queue management, encryption and image compression.

Are you ready for HIPAA? Monitor and track study distribution and audit study access within any facility on any PACS system.

Critical paper documentation can be scanned and attached to the appropriate patient study.

Allow medical images to be easily distributed and viewed over intranets or the Internet.

UltraBROKER is an HL7 brokering solution integrating any HIS/RIS with any Radiology Imaging System!
